

Alfa Laval SaniMidget SB 3-A

Rotary spray head tank cleaning device for low-flow-cleaning in hygienic applications

Introduction

The Alfa Laval SaniMidget SB 3-A is a rotary spray head tank cleaning machine for hygienic environments. Designed to clean tanks from 1-15 m³.

The Alfa Laval SaniMidget SB 3-A minimizes the consumption of water and cleaning media. Easy to customize to meet customer requirements, the SaniMidget SB 3-A allows companies to spend less time cleaning and more time producing.

The SaniMidget SB 3-A is authorized to carry the 3-A symbol.

Application

The Alfa Laval SaniMidget SB 3-A is designed for the removal of residues from hygienic tanks across dairy, brewery, distillery, beverage, food, personal care and many other industries.

Benefits

- 40% faster cleaning = more time for production
- Saves up 40% of your cleaning cost
- Dynamic cleaning performance and 360° full wetting
- Easy to retrofit traditional spray balls to a more economical solution

Standard design

Different choice of spray patterns suitable for various applications and tank designs, ranging from simple tanks to more complex tanks with structures such as agitator and baffles. The SaniMidget SB 3-A is lubricated by the cleaning media.

Working principle

The flow of the cleaning media causes the head of the Alfa Laval SaniMidget SB 3-A to rotate, and the fan-shaped jets layout a swirling pattern throughout the tank or reactor. This generates the wetting/impact needed for the efficient removal of the residual product; the cascading flow covers all internal surface of the vessel.

Flow Rate

Cleaning radius

For Clip-on models, the flow rate is increased by approx. 0.5 m³/h.
Note: The inlet pressure has been taken immediately before the inlet to the machine. In order to achieve the performance indicated on the curves, the pressure drop in the supply lines between pump and machine must be taken in consideration and the water temperature during testing was approx. 20°C.
